

NISMO

Luminaire design: Michel TORTEL

NISMO is a luminaire designed to be urban and decorative.

NISMO suggests new types of lighting and silhouette in the urban space. Its design is universal, elegant and innovative. It inscribes the luminaire into an original verticality: the arms become design objects and lose their character of a weighty technical constraint. Their disposition, by night, frees them from an all-too predictable uniformity.

By day, individually envisaged, **NISMO** also plays with perspective; it questions the inhabitants with its gently symmetrical silhouette.

These innovations in service and usage, useful, visible and realistic, open up a wide range of possibilities for lighting engineers and urban planners.
